DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: it is unclear exactly what "the blade module" in line 9 refers to, since it was not previously set forth as such. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Schmanski (US 5,015,119).** Schmanski discloses an anti-glare safety divider frame mounted and anchored onto a road barrier seen as barricade (11), comprised of: 1) two intersecting bars seen as shoulders (14); 2) two vertical rods seen as posts (20); 3) a blade frame seen as panel (32), which is equipped with various kinds of blades; 4) plurality of extends extended from the blade frame seen as flanges (37); and 5) bolts and nuts for fixing the blade module onto the intersecting bars seen as pins (24).

Art Unit: 3671

Allowable Subject Matter

4. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
